Save Millions In Toronto From Cancer!

Hi, my name is Vijay Sarma, my number is 647-857-5755, and I'm running for Mayor to make a real difference. For example, 1 in 3 Canadians are expected to get cancer. After 80 years and billions spent on re-search with no cure, we shouldn't just wait for one. Instead of just running marathons to help big banks and drug companies sell drugs, why not also share great websites like NaturalNews.com, Gerson.org and PhoenixTears.ca to help us all prevent or treat cancer? Millions worldwide do! So we can too! ☺

We can just look at our options and think for ourselves. Why not focus green efforts on daily toxins causing cancer? When they're wrong all the time: why worry about the weather in 20 years more than people now? Will our candidates help us handle real issues?
